WRAITH - OSINT / GIT

CI - CD Test and Stages:

The screenshot displays the GitHub Actions interface for a workflow named 'test'. The left sidebar shows the workflow's structure with 'test' and 'release' jobs. The main panel shows the 'test' job, which succeeded 27 seconds ago. It contains two steps: 'Run RSpec tests' and 'Post Checkout code'. The 'Run RSpec tests' step shows a series of warnings about environment variables and constants, followed by a successful completion. The 'Post Checkout code' step shows a series of commands for setting up the environment, including setting up the git repository and running RSpec tests. The 'Complete job' step shows the job finished successfully.

The screenshot displays the GitHub Actions interface for a workflow named 'release'. The left sidebar shows the workflow's structure with 'test' and 'release' jobs. The main panel shows the 'release' job, which succeeded 3 seconds ago. It contains two steps: 'Set up job' and 'Checkout code'. The 'Set up job' step shows a series of commands for setting up the environment, including setting up the git repository and running RSpec tests. The 'Checkout code' step shows a series of commands for checking out the code, including setting up the git repository and running RSpec tests. The 'Complete job' step shows the job finished successfully.

The screenshot displays the GitHub Actions interface for a workflow named 'release'. The left sidebar shows the workflow's structure with 'test' and 'release' jobs. The main panel shows the 'release' job, which succeeded 1 minute ago. It contains three steps: 'Set up job', 'Checkout code', and 'Create GitHub Release'. The 'Set up job' step shows a series of commands for setting up the environment, including setting up the git repository and running RSpec tests. The 'Checkout code' step shows a series of commands for checking out the code, including setting up the git repository and running RSpec tests. The 'Create GitHub Release' step shows a series of commands for creating a new release, including setting up the git repository and running RSpec tests. The 'Post Checkout code' step shows a series of commands for setting up the environment, including setting up the git repository and running RSpec tests. The 'Complete job' step shows the job finished successfully.
